

## eTec News - March 2007 -

“ZENN Motor Company and ZAP Power Systems add the eTec LSV-100 Neighborhood Electric Vehicle Fast Charger to their vehicle Options List”

The ZENN Motor Company and ZAP Power Systems, sellers of Neighborhood Electric Vehicles (NEVs) have elected to offer the eTec LSV-100 NEV Fast Charger and the eTec LSV-2472 Convenience Charger as an optional feature to their NEV vehicle line-up.

Customers can now order an eTec LSV-100 directly from ZENN and ZAP with the fast charge option incorporated into the NEV. The eTec LSV-100 fast charge option allows customers to charge in minutes instead of hours, expanding the applications possible with electric vehicles.

eTec LSV-100

eTec LSV-2472

The eTec LSV-100 has a DC output of 100Amps, limited to 10kW total output power and can automatically charge 36VDC, 48VDC, 72VDC and 96VDC battery packs. The eTec LSV-2472 has a DC output of 24 Amps and a discrete output of 72VDC nominal output voltage. Additional information on the eTec fast charge products can be found at [www.etecevs.com](http://www.etecevs.com). ZENN motors can be found at [www.zenncars.com](http://www.zenncars.com) and Zap Power Systems and [www.zapworld.com](http://www.zapworld.com).
