### “Successful Operation of the Stage One installations of the ETEC SuperCharge™ Systems at Toronto Airport Leads GTAA to give the Go-Ahead for Stage Two”

The Greater Toronto Airport Authority (GTAA) has confirmed the order for “Stage Two” which provides an additional forty (40) fast charge ports at the Toronto Lester B. Pearson International Airport. With this order, Toronto airport will over 112 total fast charge ports installed throughout the airport.

GTAA anticipates an additional 40 to 60 fast charge ports may be available before the end of 2005, completing both the new Terminal, and Terminal 3 at the Toronto Airport. We appreciate the additional order and believe this conveys the satisfaction by our customers on our SuperCharge™ product line.

GTAA and it’s airport tenants utilize the fast chargers for everything from Electric Ground Support Equipment such as Bag Tugs to electric personnel carriers used throughout the airport terminals.
